MOTIVATION

The *Miller Conference on Radiation Chemistry* is organized every second year and was supposed to have been held in 2021. Due to the pandemic, the conference is postponed until 2023. As this has been the fate of several international conferences in the field, the chances for early career scientists to present their work and to establish valuable connections have been very scarce. For this reason, the *Miller Trust for Radiation Chemistry* has decided to host an online workshop on radiation chemistry.

SCOPE

The *Miller Online Workshop on Radiation Chemistry* has a particular focus on giving early career scientists the chance to present their work orally in short talks. Several senior scientists from different fields of radiation chemistry will be invited to give longer highlight talks. However, the majority of the talks will be given by early career scientists. Everyone (senior scientists as well as early career scientists) is encouraged to present a poster. The scope will include all fields of fundamental and applied radiation chemistry.

IMPORTANT DATES AND INFORMATION

Platforms: Zoom (talks) and Gather (posters & networking)

Fee: Free of charge (but registration is mandatory)

Registration page: miller-workshop.sciencesconf.org/registration

Registration opens: 8 November 2021

Deadline for abstract submission (oral & posters): 31 December 2021

Notification of acceptance: 15 January 2022

Registration closes: 7 February 2022

Website: miller-workshop.sciencesconf.org

Email: Miller-Workshop@sciencconf.org
